RoHS 2, REACH, and Conflict Minerals Statement SCS Labels

SCS Labels fall outside the scope of the RoHS 2 2011/65/EU directive. The European directive is to control hazardous substances (RoHS Reduction of Hazardous Substances) in a number of categories. SCS Labels are not included in any of the RoHS 2 categories.

However, none of the following materials have ever been intentionally added in manufacturing of these products: dimethyl fumarate, as well as lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) as outlined in Directive 2002/95/EC Article 4.1.

Regarding European Regulation REACH 1907/2006/CE (Registration, Evaluation and Authorization of Chemicals) these products should be considered an article under the REACH guidelines. They do not contain substances intended to be released under normal or reasonably foreseeable conditions of use. As such, there is no obligation for registration or notification under the REACH Directive.

However, none of the REACH substances of very high concern as of 2017/01/12 have ever been intentionally added in manufacturing these products.

In addition, no Conflict Minerals have ever been intentionally added in manufacturing this product.

The product composition information is to the best of our knowledge and may be based on third party supplier information and/or our knowledge and experience regarding typical substance composition found in materials used in ESD control and other products.

See [SCS limited warranty](#) which states in part: "If this product is defective within the warranty period stated above, the exclusive remedy shall be for SCS, at its option, to replace or repair the SCS product or refund the purchase price of the SCS product.
